Experience

Full Stack Development Intern, Otomator Technologies

Jun 2025 – Present

- Developed production-grade **AI systems**, **IoT platforms**, and **real-time mobile infrastructure** using React, React Native, Node.js, and cloud-native architectures.
- Built scalable backend services, **MQTT/WebSocket communication layers**, **vector-search AI pipelines**, and **Redis-backed workers** across 5+ platforms.
- Optimized API performance, application scalability, and state-management workflows, improving operational responsiveness by **80%+**.
- Collaborated in **Agile/Scrum** teams with product, design, and DevOps stakeholders to deliver cloud-ready multi-platform systems.

Skills

Languages: C++, Python, JavaScript, TypeScript, PHP

Frontend: React, React Native, Next.js, Tailwind CSS, Nativewind

Backend & Infrastructure: Node.js, Express.js, MongoDB, MySQL, Redis, ChromaDB, Firebase

AI & Realtime Systems: LangChain JS, Gemini AI, RAG, Vector Embeddings, Semantic Search, Socket.IO, MQTT, WebSockets

Cloud & Tools: AWS, Azure, GCP, CI/CD, Git, REST APIs, RTK Query, System Design, Agile/Scrum

Projects

CampusCravings — Campus Food Ordering Platform

Jan 2025 – Jun 2025

- Built a **multi-tenant** food ordering platform with a **React** student app and admin dashboard supporting **real-time** order workflows.
- Engineered an **AI-powered RAG pipeline** using **LangChain JS**, **Gemini AI**, **ChromaDB**, and **vector embeddings** for conversational nutrition recommendations and semantic retrieval.
- Developed **LLM orchestration pipelines**, retrieval ranking, fallback scoring, and **Socket.IO-based** analytics infrastructure.
- **Tech:** MERN, React Native, LangChain JS, Gemini AI, ChromaDB, Socket.IO, Firebase
- **AI Pipeline:** RAG, Semantic Search, Vector Embeddings, LLM Ranking, Conversational Retrieval, Retrieval Orchestration

IdeaCard — Otomator Technologies

Aug 2025 – Nov 2025

- Built an **enterprise-grade** school management ecosystem with **biometric attendance**, payment workflows, and centralized operational tooling.
- Deployed four **React Native** applications supporting teachers, parents, vendors, and drivers through unified backend systems.
- **Tech:** PHP, React Native, JavaScript, MySQL

VioletC IoT Ecosystem — Otomator Technologies

Feb 2026 – May 2026

- Developed an end-to-end **IoT air management platform** with React 19, React Native, and scalable Node.js infrastructure.
- Engineered **MQTT telemetry pipelines** and **Redis-backed workers** for automated alerts, historical aggregation, and real-time monitoring.
- **Tech:** React 19, React Native, Node.js, MQTT, Redis

EV Charging — Otomator Technologies

Nov 2025 – May 2026

- Solely developed a production-scale **React Native (Expo)** EV charging platform with **real-time charger communication** and map-based workflows.
- Engineered **MQTT over WebSockets**, **RTK Query state architecture**, and a **Next.js guest-authentication system** for instant charging sessions.
- **Tech:** React Native, Expo, TypeScript, MQTT, RTK Query, Next.js

Education

B.Tech in Computer Science, Bennett University

2022 – Present

Senior Secondary Schooling, Capt. Ganga Singh Rawat IC

2020 – 2022

Certifications & Achievements

- AWS Certified Cloud Practitioner — 840/1000
- Deep Learning & Reinforcement Learning — IBM (98.5%)
- Agile Software Development — University of Minnesota (93.4%)
- Networking Fundamentals — Google (92.2%)
- Top 15 (University Level) — Smart India Hackathon 2023
